TeamChat AI — final requirement verdict

61 precise criteria reviewed against the employer ASSESSMENT.md, complete recruitment thread, submitted six-page Technical Brief and source. 17 GREEN (offline/documentary evidence); 44 RED (live proof or deliverables outstanding). No overall release approval.

GREEN means only the specific evidence named has passed. RED means final evaluator-facing acceptance has NOT passed. Original stated deadline (Feb 9) was superseded in Gmail: Friday October 16, 2026. GitHub reviewer: @paluchi.

Correspondence

ID	Requirement	Source	Status	Evidence / next action
E01	Original application and recruitment conversation reconstructed	Gmail/Technical Brief	**GREEN — offline**	Retain thread reference
E02	October 16 Friday deadline replaces obsolete Feb 9 IST	Gmail/Technical Brief	**GREEN — offline**	Submit by Oct 16; confirm time zone if needed
E03	Evaluation GitHub collaborator @paluchi	Gmail/Technical Brief	**GREEN — offline**	Add @paluchi if repo private; document public repo access
E04	Six-page Technical Brief emailed before coding	Gmail/Technical Brief	**GREEN — offline**	Do not resend
E05	Final email to Gonzalo, cc Elisa with submission	Gmail/Technical Brief	**RED — not proven**	Draft for explicit user review; do not send automatically

Ground rules

ID	Requirement	Source	Status	Evidence / next action
G01	No Firebase database listeners, managed realtime transport or browser polling	ASSESSMENT.md:L108	**RED — not proven**	Inspect browser DevTools for a minute / no polling
G02	Native Gemini function calling; model chooses tool, server executes	ASSESSMENT.md:L119	**RED — not proven**	Run live tool-driven prompts, inspect tool traces
G03	All catalog/store/coefficient responses grounded in fetched tenant data	ASSESSMENT.md:L121	**RED — not proven**	Attempt 20 unfetched codes, foreign facts and malicious memories
G04	No cross-tenant disclosure via any interface, read, memory, error	ASSESSMENT.md:L123	**RED — not proven**	Run required real PostgreSQL tests + adversarial attacks
G05	Firebase Auth, Vertex AI Gemini, Cloud Run, Firebase Hosting, React/TypeScript	ASSESSMENT.md:L125	**RED — not proven**	Prove Firebase Hosting + Cloud Run + real login
G06	Only supplied datasets; no live catalog lookup at request time	ASSESSMENT.md:L127	**GREEN — offline**	Verify fixture hashes on target deployment

Employer evaluation

ID	Requirement	Source	Status	Evidence / next action
S01	Portable AC code & margin, two users watch fetch	ASSESSMENT.md:L190	**RED — not proven**	Two live browsers; trace/logs/code
S02	Reverse code-to-description lookup	ASSESSMENT.md:L191	**RED — not proven**	Live get_catalog_code call
S03	AC + SSD in same query	ASSESSMENT.md:L192	**RED — not proven**	Real native Gemini calls; both families
S04	Beekeeping veils must return no data	ASSESSMENT.md:L193	**RED — not proven**	Live no-match and zero invented codes
S05	ST-4003 margin score and class supersession	ASSESSMENT.md:L194	**RED — not proven**	Check retained/removed classes and no fabricated money
S06	ST-4007 gaps+evidence+coefficient result	ASSESSMENT.md:L195	**RED — not proven**	Store + calculation tools in order; source refs
S07	Compare two proposed codings	ASSESSMENT.md:L196	**RED — not proven**	Direct B-minus-A authoritative result
S08	Paraphrased seeded memory from different room	ASSESSMENT.md:L197	**RED — not proven**	Real Vertex embeddings/backfill; author/date/ref
S09	New contact/deadline accessible across users and rooms	ASSESSMENT.md:L198	**RED — not proven**	Save consent; refresh user B, search other room
S10	Nested memory validation and single repair attempt	ASSESSMENT.md:L199	**RED — not proven**	Actual invalid nested payload and repair path
S11	Overlapping tracked target tenant-only	ASSESSMENT.md:L200	**RED — not proven**	Both tenants same intent, isolation verified
S12	Foreign store invisible after forged access claim	ASSESSMENT.md:L201	**RED — not proven**	Unknown == foreign response; logs generic
S13	Admin-mode prompt injection no bypass	ASSESSMENT.md:L202	**RED — not proven**	Attack prompt and memory injection live
S14	Two concurrent AI turns independent	ASSESSMENT.md:L203	**RED — not proven**	Two simultaneous turns, separate tool IDs
S15	Refresh mid-turn replays full answer and tool results	ASSESSMENT.md:L204	**RED — not proven**	Refresh browser during active Gemini call
S16	30-second disconnect ordered gap-free replay	ASSESSMENT.md:L205	**RED — not proven**	Network offline 30s; no missing/duplicates
S17	Idle one socket and no polling or resource growth	ASSESSMENT.md:L206	**RED — not proven**	Browser network/CPU/heap on idle
S18	Valley gets only its own tenant answer	ASSESSMENT.md:L207	**RED — not proven**	Test both tenants, foreign/no-match equivalence
S19	Cold-start persistence of saved shared memory	ASSESSMENT.md:L208	**RED — not proven**	Scale down/restart worker+API, query memory

Phase 1

ID	Requirement	Source	Status	Evidence / next action
B01	Brief sent before application code	ASSESSMENT.md:L17	**GREEN — offline**	Preserve original email and PDF
B02	User stories with acceptance criteria	ASSESSMENT.md:L158	**GREEN — offline**	Present committed scope
B03	Derived requirements	ASSESSMENT.md:L160	**GREEN — offline**	Explain tenant context, durable ACKs
B04	Alternatives and architecture tradeoffs	ASSESSMENT.md:L162	**GREEN — offline**	Discuss PostgreSQL NOTIFY vs Redis
B05	Data model and performance tradeoffs	ASSESSMENT.md:L164	**GREEN — offline**	Explain RLS and room seq lock
B06	Explicit exclusions and risks	ASSESSMENT.md:L166	**GREEN — offline**	Keep README divergence accurate

Deliverables

ID	Requirement	Source	Status	Evidence / next action
D01	Deploy public Firebase Hosting app with seeded data	ASSESSMENT.md:L217	**RED — not proven**	Deploy and verify public URL
D02	GitHub repository, clean commit history, no secrets, repeatable seed	ASSESSMENT.md:L218	**RED — not proven**	Push source to GitHub; git secret scanner; README
D03	README complete: run/deploy/transport/agent/recovery/brief divergence/limits	ASSESSMENT.md:L172	**RED — not proven**	Update instructions after live verification
D04	Test credentials for 3+ users in each tenant	ASSESSMENT.md:L220	**RED — not proven**	Provision 6 Firebase users; share secrets privately
D05	Tests for tenant isolation, grounding, and arithmetic	ASSESSMENT.md:L221	**RED — not proven**	Run actual RLS with restricted login and Gemini adversarial tests
D06	Demo video max five minutes	ASSESSMENT.md:L222	**RED — not proven**	Record truthful 5m or shorter video
D07	Submission includes repo URL, live URL, private credentials, and brief	ASSESSMENT.md:L236	**RED — not proven**	Draft final email after passing gates
D08	Seed genuine fetched AI history in both tenants	ASSESSMENT.md:L180	**RED — not proven**	Run genuine model/tool exchange, inspect DB replay
D09	3+ users per tenant and populated rooms	ASSESSMENT.md:L180	**RED — not proven**	Create real Firebase accounts and room memberships

Engineering/brief gaps

ID	Requirement	Source	Status	Evidence / next action
A01	API/worker SIGTERM/SIGINT closes server, WebSockets, listeners and pool	Gmail/Technical Brief	**GREEN — offline**	Live send SIGTERM and verify exit/drain
A02	No late presence/typing frames after unsubscription	Gmail/Technical Brief	**GREEN — offline**	Live switch rooms under rapid typing and presence
A03	Offline tests finish with 0 failed	Gmail/Technical Brief	**GREEN — offline**	Run again after installing pinned dependencies
A04	Backend type-check passes under temporary external node types	Gmail/Technical Brief	**GREEN — offline**	npm ci and repeat in clean CI
A05	All five supplied fixture hashes unchanged	Gmail/Technical Brief	**GREEN — offline**	Do not mutate fixture data
A06	SQL seed generates 2,753 inserts	Gmail/Technical Brief	**GREEN — offline**	Run actual migrations + seed twice
A07	Genuine root/web npm package-locks and npm ci	Gmail/Technical Brief	**RED — not proven**	Generate genuine locks using registry, npm ci twice
A08	Real PostgreSQL RLS + grants + forbidden-write isolation	Gmail/Technical Brief	**RED — not proven**	Prove with restricted teamchat_api login
A09	Vite/React production build and hosted asset load	Gmail/Technical Brief	**RED — not proven**	npm --prefix apps/web ci && npm --prefix apps/web run build
A10	Cloud Tasks OIDC, recovery, duplicate dispatch	Gmail/Technical Brief	**RED — not proven**	Inject failures and verify end-to-end terminal state
A11	Gemini model native stream + parallel function calls	Gmail/Technical Brief	**RED — not proven**	Real Vertex calls under pinned model
A12	Cross-instance LISTEN/NOTIFY, bounded socket resources	Gmail/Technical Brief	**RED — not proven**	Deploy 2 instances, network loss, leak tests
A13	Original Technical Brief monetary-baseline promise	Gmail/Technical Brief	**RED — not proven**	Implement verified user-provided baseline or document cut explicitly
A14	Memory paraphrase retrieval using 768-dim embeddings	Gmail/Technical Brief	**RED — not proven**	Backfill and test cross-room paraphrases
A15	Actual 3-user x 2-tenant seeded chat with genuine AI exchange	Gmail/Technical Brief	**RED — not proven**	Run script and verify as reviewer
A16	Reviewer GitHub @paluchi actually has access	Gmail/Technical Brief	**RED — not proven**	Add on private repo or verify public accessibility
